Questions We Hope to Answer

We hope to find out if a team can have a better record than projected using data from their past to predict if their future would be a better record or worse.

It's in the Data

We used data from ProFootball Reference, NFL.com, ESPN.com, and individual team websites.

We gathered offensive rating, defensive rating and QBR stats from ProFootball Reference and ESPN.com

NFL.com we found the divisions and their seasonal records for wins and losses.

Individual team websites provided the head coaching returned or not information
